A live and archived webcast of the fireside chats and presentations will be available via the [Events & Webcasts](#) section of the [Prometheus Biosciences](#) website. A replay of the presentation will be available for 30 days following the event.

### About Prometheus Biosciences

Prometheus Biosciences, Inc. is a clinical-stage biotechnology company pioneering a precision medicine approach for the discovery, development, and commercialization of novel therapeutic and companion diagnostic products for the treatment of immune-mediated diseases, starting first with inflammatory bowel disease (IBD). The Company's precision medicine platform, Prometheus360, combines proprietary machine learning-based analytical approaches with one of the world's largest gastrointestinal bioinformatics databases to identify novel therapeutic targets and develop therapeutic candidates to engage those targets.

The Company's lead candidate, PRA023, is an IgG1 humanized monoclonal antibody (mAb) for the treatment of the two most common forms of IBD, Ulcerative Colitis (UC) and Crohn's Disease (CD). The Company has initiated enrollment in a Phase 2 trial in UC patients and a Phase 2a trial in CD patients, each utilizing a genetic-based companion diagnostic designed to identify patients more likely to respond to PRA023.
